CERTIFICATION OF PROJECT MUTUAL TEL**Reporting Period January 1 – December 31, 2016****Sec. 54.313(a)(5) Service Quality Standards and Consumer Protection Rules Compliance**

Pursuant to § 54.313(a)(5) for High-cost Recipients, Carrier hereby certifies that it is in compliance with applicable service quality standards and consumer protection rules.

Carrier completes installation requests and responds to service orders from existing and new locations within 5 business days of the request to existing customers and within 10 days if a new drop is required to reach a new customer. Carrier provides bill notification 30 days in advance of any customer rate changes. Carrier provides notice to customers of their billing practices through their terms and conditions located on their Carrier's website and in their retail office. An annual Lifeline Notice is also printed in the local newspaper annually. Carrier's procedures for receiving emergency calls during non-business hours include having a technician on call 24 hours a day, 7 days a week. Any after hour emergency calls are directed to a queue for emergency service which is relayed to the technician on call. The technician then responds to all service related calls.

Carrier follows Customer Proprietary Network Information (CPNI) rules and also files the annual CPNI certification with the FCC pursuant to the FCC's current CPNI rules and regulations. Attached is an annual notice to customers on matters related to customer privacy. Carrier has also implemented an Identity Theft Prevention Program in accordance with the federal Red Flags Rule.

I verify that the foregoing is true and correct. Executed on May 23, 2017.

CERTIFICATION OF PROJECT MUTUAL TEL**Reporting Period January 1 – December 31, 2016****Sec. 54.313(a)(6) Ability to Function in an Emergency Situation**

Pursuant to § 54.313(a)(6) for High-cost Recipients, Carrier hereby certifies that it is able to function in emergency situations as set forth in § 54.202(a)(2). Carrier is able to remain functional in an emergency situation through the use of back-up power to ensure functionality without an external power source. Carrier is able to provide service for a reasonable period of time if external power is lost.

All locations requiring commercial power are equipped with an 8 hour battery backup and/or emergency generators. The connection to the fiber electronics in the homes and businesses is also designed for eight (8) hour battery backup. All electronic cabinets and remote electronic sites are equipped with the necessary wiring and power supplies (rectifiers) to sustain operation beyond the eight (8) hours of battery backup with the use of portable or fixed generators.

Battery backup is tested yearly by a designated employee. The designated employee tests the batteries and replaces batteries that do not meet Carrier's specifications (8 hour backup) and cleans & replaces all necessary connections. All batteries are on a replacement rotation, so are replaced regardless of how they test, to ensure backup is secure. Emergency generators are tested annually by an outside contractor.

Carrier's network is engineered to handle reasonable excess traffic in the event of traffic spikes resulting from emergency situations. Carrier's fiber ring technology protects well from loss of toll trunking. Carrier has redundancy in its network for use in re-rerouting traffic when facilities are damaged.

I verify that the foregoing is true and correct. Executed on May 23, 2017.
